

AZIZ SAIF · AI SERVICES

AI Services with Claude

Turn any document into a narrated presentation — in minutes, not days.

THE PROBLEM

Documents are static. Attention is not.

- A report, a proposal, or a lecture sits in a file nobody opens.
- Turning it into a polished, narrated deck takes hours of manual work.
- Sharing it usually means a flat PDF with no voice and no flow.
- By the time it looks good, the moment has passed.

THE IDEA

One upload → a complete presentation

- Drop a Word, PDF or PowerPoint into your private account.
- It is rewritten into clean slides: title, key points, and a narration script.
- You get an interactive web deck plus a downloadable PPT and PDF.
- Everything is indexed in one place and published to your blog.

HOW IT WORKS

The four-step pipeline

- 1. Upload — stage your file in the gated dashboard.
- 2. Convert — the content becomes slides with narration.
- 3. Publish — the deck is added to your private index.
- 4. Share — a blog card goes live with PPT and PDF links.

WHAT YOU GET

Play online, with a voice

- A full-screen player with back, pause, stop and forward controls.
- Voicebot narration that reads each slide aloud and auto-advances.
- A slide index and a thumbnail strip to jump anywhere instantly.
- Works on any device, straight from the browser — nothing to install.

WHAT YOU GET

Download as PPT and PDF

- A real PowerPoint file you can edit and present offline.
- A matching PDF for email, print, or quick review.
- Both are generated from the same source, so they always agree.
- Branded automatically in the Aziz Saif house style.

BUILT ON

The same studio as the Aftab lectures

- This reuses the exact deck engine behind the Dr Aftab Ahmad lectures.
- Proven layout, narration, and download workflow.
- Private by default — the workspace is password-protected.
- No duplicates: each document is published to the blog only once.

GET STARTED

Upload your first document

- Open your private account and drag a file into the upload box.
- Word, PDF or PowerPoint — all supported.
- Watch it appear in the index, ready to play and download.
- Then send it anywhere with a single link.
